

## DOOR FINGER GUARDS

Every year, many children's fingers are trapped in the door and doorframe causing serious finger injuries. Finger entrapment in doors mainly happens in the age group 0 to 8 years old. Finger pinches in the door and the doorjamb is one of the most common causes for visits to hospitals in this age group. To prevent finger entrapment we offer the following door finger guards as a solution:

### Finger Alert 110°

Prevent finger entrapment on the hinge side of the door

Prevent fingers from getting pinched in the door and doorframe by using the Finger Alert door finger guards, the perfect finger safe protection for doors! The Finger Alert 110° is especially designed for the consumer market and for the price sensitive, lower end of the professional market such as schools and kindergartens. These finger guards for doors consist of a wide strip for the gap side / inner side of the door and a narrow strip for the hinge side of the door. It is suitable for doors opening up to 110° and a maximum door thickness of 5 cm/2».

available in 120 cm, 150 cm and 180 cm

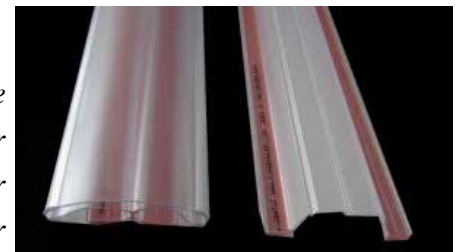

colour: transparent and white (120 cm only)

tested for 250.000 opening and closing movements

two year warranty

easy to stick on the door and doorframe with double-sided Tesa tape

The Finger Alert 110° door finger guards are normally sold per set (wide and narrow strip) and can easily be stuck on the door and doorframe. For professional use, we recommend using screws as well. The Finger Alert door guards include Tesa double-sided tape. It is possible to order the wide or narrow Finger Alert finger guards for doors separately.

### Finger Alert 180-170° Professional

Door finger protector

TUV Arte Viva Finger Alert 180-170

The Finger Alert 180-170° Professional is a professional finger protector for doors. These Finger protectors consist of a strip for each side of the door and two click strips, possible to order separately. The strips are able to withstand normal wear and tear. The Finger Alert finger guards for doors are easy to install which saves a lot of time (and money). With the click strips, these door finger protectors can be detached from the door for maintenance in a few seconds.

tested by making 250,000 opening and closing movements

two year warranty

TÜV certified

suitable for swing doors (please use 2x wide strip)

suitable for automatic doors (according to the new EN 16005 norm)

## Corner Guard Standard

The Corner Guard Standard is the perfect wall corner guard protector for the professional and consumer market. In virtually every building, the walls, windowsills and radiators have sharp, protruding corners and edges which are potentially dangerous for children running around and playing. A fall against a sharp corner or edge can be very painful and lead to serious injuries. Our wall corner protectors are shock-proof and hard-wearing.

colours: transparent, white and grey  
indoor use

dimensions: 100 x 1.5 x 1.5 cm

can withstand temperatures up to 110°C

easy to install (strips pre-fitted with Tesa tape)

made of TPE

### Applicaton

The Corner Guard Standard are made of TPE and play.

### Corner protector

Young children fall. It is part of growing up. The Corner wall protectors from Arte Viva prevent injuries caused by falling on corners and edges. Edge protection is, in our opinion, essential in schools, kindergartens, child daycare centres, playgrounds etc. Also see our pencil design wall corner protectors, Corner Guard Deluxe, the Corner Guard Deluxe Pencil and table corner guard.

## Corner Guard Deluxe

The Corner Guard Deluxe is the perfect corner protection for the professional market. In virtually every building, walls, window sills and radiators have sharp, protruding corners and edges which are potentially dangerous for children running around and playing. A fall against a sharp corner or edge can be very painful and lead to serious injuries. Our Corner Guards edge protectors are shock-proof and hard-wearing. Indispensable in an environment where children play.

indoor and outdoor use (weatherproof) easy to mount on corners with MS polymer
